Manager Tests

1.1	Menu start up
System being tested	subsystem
Instructions	After identifying yourself as a manager click the "create new menu" button and fill out the item information one by one clicking the "+" when you are done with each entry.
Expected Results	You should have a menu that the customer can see but not edit with all your desired menu items appropriately listed.

1.2	Editing the menu
System being tested	Subsystem
Instructions	Use the "-" button to delete an item from the menu. Edit the description of one of the existing menu items and click the "save" button to save any changes made.
Expected Results	watch the customer's side of the menu reflect the changes made.

1.3	Making a special
System being tested	module
Instructions	Click the "new special" and add the appropriate items and specify a price for the combo. Click the "save" button to save the special to the menu
Expected Results	You should see the new special appear in the menu.

1.4	Edit a special
System being tested	Module
Instructions	Select the special you want to change. Alter the special price and click the save button
Expected Results	The new price entered should appear as that special's price.
